

MISSION

I consciously participate in the creation and establishment of the New Earth by transmitting high-vibration energies through my body, thus fulfilling my mission as a Teacher-Healer. I experience special fulfillment by anchoring the feminine principle on Planet Earth and by learning and implementing the principles of harmonious living here and now.

In year 1990, I experienced a spiritual transformation and entered into expanded Cosmic Consciousness; more in the Story

The acquired direct knowledge replaced all other techniques in the language of symbols and cosmograms, i.e., images of the movement of the cosmic ether. Higher sensory perceptions with which I recognize energies have been revived. As a researcher of spiritual science, with the aim of revealing spiritual laws, I reveal their manifestation in the dimension of Life here and now.

When my Consciousness relaxed and embarked on a galactic exploration, arriving at the Central Galactic Sun, I realized:

- Consciousness has unlimited possibilities for expansion into various vibrational fields of the ether and the ability to simultaneously exist in a condensed material form.
- Experiences and journeys in expanded Consciousness are no less real than experiences and movements in material, 3D reality.

In group meditations between 1999 and 2002, an individual symbol was revealed at each meeting, which was then combined into a model for recognizing the state of consciousness at a given moment for an individual who embarks on the path of studying this model. The model is shown in the Diamond of Consciousness menu. In 2012, the basic website (www.mandorlasi.net) for the **Diamond of Consciousness** model was launched, and in 2025, the website was updated with additional content (www.mandorlanova.net). You can use both www addresses to access all the updated content.

With gratitude and reverence to the Masters, Galactic Beings, and earthly companions, I joyfully participate and surrender to the tasks of implementing the plan of LIGHT on Planet Earth.
